Job Description

Job Description -Deputy MMS Manager

My client is an established railway engineering consultancy looking to recruit an Electrical Engineer who specialises MMS for projects based in Vietnam.

Project Overview

This Engineering, Procurement and Construction (EPC) project for the Electrical and Mechanical (E&M) Systems (i.e. Rolling Stock, Signalling, Telecommunications, Power Supply, Overhead Catenary System, Track Work, Platform Screen Doors, Automatic Fare Collection, Depot and Workshop Equipment, Facility SCADA, Signage and Graphics) is in relation to the first Metro line to be built in Ho Chi Minh City, Vietnam.

Within the Depot and Workshop Equipment specification there is a requirement to supply a comprehensive, system-wide, computerized Maintenance Management System (MMS) consisting of software, hardware and installation for the planning and management of all maintenance work and associated functions of the Line 1 railway.

The MMS is required to provide effective decision support for the management of maintenance including for the following
